## INCUBATOR - I-36NL

### Shelving

- \*Six tiers of white epoxy coated steel wire shelving (each shelf is 27"D x 28.7"W)
- \*Shelves are supported by shelf clips allowing ½" vertical adjustments
- \*Maximum clearance between shelves is 8" per tier with all six shelves installed

### Finish

- \*Interior and exterior painted with high reflective, environmentally friendly, high temperature baked white powder coating

### Refrigeration

- \*Self-contained air-cooled condensing unit with hot gas bypass system for continuous compressor operation, extended life and close temperature control (this continuous running condensing unit ensures precise temperature control by alternating cycling refrigerant and hot gas to coil; this also prolongs life of compressor, and eliminates risk of ice build up in coil)
- \*Top mounted refrigeration system allows easy access for maintenance (e.g. cleaning)
- \*As heat is rejected, it rises and is dissipated into room without having any effect on inside temperature of cabinet
- \*Solenoid valves have extended stem for quiet and long life operation
- \*Ceiling mounted evaporator coils incorporate twin air circulation fans in aluminum housing (heat rejection to ambient with standard chamber: 1865 BTU/hr)

### Temperature Range

- \*2-44C (±0.5°C)

### Temperature Safety Limit Controls

- \*Experiment Protection: Adjustable high and low temperature controls, audible alarms, and visual indicators provided
- \*Controls shut down all power to chamber, activating alarms (when the temperature returns to the normal range the system will automatically reset)
